Foundation Swimming Skills course is an interactive, theory and practical application based course in an environment that encourages participation and mastering of skills. Video clips and practical sessions are used to aid understanding of the material learnt and application of the skills to become an effective teacher of swimming and water safety.

The course content is presented in modules. Each module covers a specific area of swim teaching and management skills thereby enhancing the skills of teachers of swimming to be more effective, innovative and decisive.

Topics covered but not limited to:

• Communication skills and strategies to overcome communication barriers	• Down time and strategies to keep kids moving
• Learning and effective learning environment	• Manage Swimmers and strategies
• Perception	• Manage Parents and strategies
• Observation skills	• Teaching the basics well
• Class management and formations	• The importance of floating, sculling, rotation
• Teaching Strategies and methods	• Progressions of LTS
• Positioning of teacher	• Ideas and Teaching points
• Holds	• Water safety

An understanding and application of the course content is assessed during the course through a series of worksheets and practical sessions to establish competency. Upon completion of the course and competency being established the participant will be issued with National Certificate in Recreation & Sport – Aquatics (Swim Education) Level 3 qualification.

Cost:

- \$230.00
